

Mr. Zak Covar
Executive Director
Texas Commission on Environmental Quality
P.O. Box 13087
Austin, Texas 78711-3087

Draft

Dear Mr. Covar:

I am pleased to inform you Region 6 finds TCEQ's application to exempt portions of the Fusselman Dolomite, Montoya Dolomite and El Paso (dolomite and limestone) group in El Paso County, Texas, a non-substantial revision to its underground injection control program. As such, by authority delegated to our Regional Administrator and redelegated to the Water Quality Protection Division, we approve the exemption under the criteria provided in Title 40 of the Code of Federal Regulations §146.4. Specifically, we find portions of these dolomite and limestone groups meet the criteria for exemption at:

- §146.4 (a): It does not currently serve as a source of drinking water; and
- §146.4 (c): The total dissolved solids content of the ground water is more than 3,000 and less than 10,000 mg/l and it is not reasonably expected to supply a public water system.

The areal extent and horizontal boundaries of the exempted portions of these dolomite and limestone groups are as described in TCEQ's February 27, 2012 aquifer exemption application cover letter and depicted in figure 2 of TCEQ's Aquifer Exemption Order, Docket No. 2011-1814 (enclosed). This exemption applies only to disposal of desalination wastes for 50 years through the three existing disposal wells, as modeled in the application for exemption. The existing wells are close to the Texas / New Mexico border. As such their respective injection rates must not exceed those assigned in the model unless the net effect will reduce the potential for migration towards New Mexico. Any modification significantly modifying the injection as modeled and adversely affecting the protection of USDWs in New Mexico will require additional approval.

If you have any questions, please contact Mr. Philip Dellinger, Chief, Ground Water / UIC Section at (214) 665-8324.

Sincerely,

William K. Honker, P. E.
Acting Director
Water Quality Protection Division (6WQ)
